# Restoration Project Overview

The funds raised will pay for renovation costs, including structural repairs, cleaning, improved access, and safety features and ongoing annual maintenance.

The stages of the project are shown below:

## Phase 1

**Clearing of overgrown vegetation** and sand from steps down to the tidal pool. This was completed on 21/10/25 by Clean and Green.

**Before**

**After**

## Phase 2

**Installation of handrail** (shown in blue to the left and above) to stop people walking along the cliff and on the right-hand side to provide safety down the steps.

## Phase 3

- A.** Repair and refurbishment of the existing **sluice valve** mechanism
- B.** Construct **cope upstand** to damage area
- C. Plug vulnerable voids** with seaside wall face, this is to prevent water loss from the pool  
Remove seaweed and algae to all above.
- D. Remove excess sand**, stones and any rubbish from pool

## Phase 4

**Construction of hard landscape** area / installation of robe hooks
